Contents of Volume 62

Number 1, 7 October 1976

CONJEAUD, H. and MICHEL-VILLAZ, M., Photoinduced Electric Field Effect on the Optical Properties of Photosynthetic Membranes . 1

MOREL, J. E., PINSET-HÄRSTRÖM, I. and GINGOLD, M. P., Muscular Contraction and Cytoplasmic Streaming: A new General Hypothesis 17

CHEN, J., HUANG, C. W., HINMAN, L., GORDON, M. P. and DERANLEAU, D. A., Photomonomerization of Pyrimidine Dimers by Indoles and Proteins 53

RUBIN, H. A. and LEE, J. J., Informational Energy Flow as an Aspect of the Ecological Efficiency of Marine Ciliates 69

COMINS, H. N. and HASSELL, M. P., Predation in Multi-prey Communities 93

DEVAULT, D., Theory of Iron-Sulfur Center N-2 Oxidation and Reduction by ATP 115

RÖSSLER, O. E., Prescriptive Relational Biology and Bacterial Chemotaxis 141

DELISI, C. and PERELSON, A., The Kinetics of Aggregation Phenomena. I. Minimal Models for Patch Formation on Lymphocyte Membranes 159

ANDO, H. Y., HO, N. F. H., HIGUCHI, W. I., TURI, J. and SHIPMAN, C., JR. Systems Approach to the Study of Drug Transport Across Membranes Using Suspension Cultures of Mammalian Cells. V. Simultaneous Passive Transport and Biosynthesis . . . 211

ZAMIR, M., Optimality Principles in Arterial Branching . . . 227

Number 2, 21 October 1976

FRONTISPIECE i

DOLJANSKI, F. and KAPELLER, M., Cell Surface Shedding—The Phenomenon and Its Possible Significance 253

GREEN, D. E., The Structure of Biological Membranes in Relation to the Principle of Energy Coupling 271

HARRIS, R. J. C., Latency and the Tumour Virus Problem . . 287

HAWKINS, S. E., Recent Studies of Some RNAs and Proteins in Amoebae 299

MADDY, A. H., A Critical Evaluation of the Analysis of Membrane Proteins by Polyacrylamide Gel Electrophoresis in the Presence of Dodecyl Sulphate 315

MITCHELL, P., Possible Molecular Mechanisms of the Protonmotive Function of Cytochrome Systems 327

ORD, M. J., The Interaction of Nuclear and Cytoplasmic Damage after Treatments with Toxic Chemicals 369

OHKI, S. and OHKI, C. B., Monolayers at the Oil/Water Interface as a Proper Model for Bilayer Membranes 389

REIN, R. and EGAN, J. T., The Relation Between Genetic Recombination and Base Sequence Complementarity 409

ROSEN, R., On Rate-sensitive Chemoreceptor Systems and the Origin of the Immune Response 429

TORBET, J. and WILKINS, M. H. F., X-ray Diffraction Studies of Lecithin Bilayers 447

YOUNG, J. Z., Choice, Determinism and Value in the Light of Biological Knowledge 459

STEIN, W. D., An Algorithm for Writing down Flux Equations for Carrier Kinetics, and its Application to Co-transport . . 467

LEWIS, J. H. and WOLPERT, L., The Principle of Non-equivalence in Development 479

BURNSTOCK, G., Purinergic Receptors 491

Index to Volume 62

Aggregation phenomena, kinetics of. I Minimal models for patch formation on lymphocyte membranes, 159
Algorithm for writing down flux equations for carrier kinetics, and its applications to co-transport, 467
Amoebae, recent studies of some RNAs and proteins in, 299
ANDO, H. Y., HO, N. F. H., HIGUCHI, W. I. TURI, J. and SHIPMAN, C., JR., Systems approach to the study of drug transport across membranes using suspension cultures of mammalian cells. V. Simultaneous passive transport and biosynthesis, 211
Arterial branching, optimality principles in, 227
ATP, theory of iron-sulfur center N-2 axidation and reduction by, 115

Bacterial chemotaxis and prescriptive relational biology, 141
Base sequence complementarity and genetic recombination, relation between, 409
Bilayer membranes, monolayers at the oil/water interface as a proper model for, 389
Biological membranes in relation to the principle of energy coupling, structure of, 271
BURNSTOCK, G., Purinergic receptors, 491

Carrier kinetics, an algorithm for writing down flux equations for, and its application to co-transport, 467
Cell surface shedding—the phenomenon and its possible significance, 253
Chemoreceptor systems, rate-sensitive, and the origin of the immune response, 429
Chemotaxis, bacterial, and presciptive relational biology, 141
CHEN, J., HUANG., C. W., HINMAN, L., GORDON, M. P. and DERANLEAU, D. A., Photomonomerization of pyrimidine dimers by indoles and proteins, 53
Choice, determinism and value in the light of biological knowledge, 459
Ciliates, marine, informational energy flow as an aspect of the ecological efficiency of, 69
COMINS, H. N. and HASSELL, M. P., Predation in multi-prey communities, 93
Co-transport, an algorithm for writing down flux equations for carrier kinetics, and its application to, 467
Critical evaluation of the analysis of membrane proteins by polyacrylamide gel electrophoresis in the presence of dodecyl sulphate, 315
Cytochrome systems, possible molecular mechanisms of the protonmotive function of, 327
Cytoplasmic streaming and muscular contraction: a new general hypothesis, 17

DELISI, C. and PERELSON, A., The kinetics of aggregation phenomena. I. Minimal models for patch formation on lymphocyte membranes, 159
DERANLEAU, D. A. (see CHEN, J.) 53
Determinism, choice and value in the light of biological knowledge, 459
DEVAULT, D., Theory of iron-sulfur center N-2 oxidation and reduction by ATP, 115
Dodecyl sulphate, a critical evaluation of the analysis of membrane proteins by polyacrylamide gel electropharesis in the presence of, 315

DOLJANSKI, F. and KAPELLER, M., Cell surface shedding—the phenomenon and its possible significance, 253
Drug transport across membranes, systems approach to the study of, using suspension cultures of mammalian cells. V. Simultaneous passive transport and biosynthesis, 211

Ecological efficiency of marine ciliates, informational energy flow as an aspect of, 69
EGAN, J. T. (see REIN, R.), 409
Energy coupling, the structure of biological membranes in relation to the principle of, 271
Energy flow, informational, as an aspect of the ecological efficiency of marine ciliates, 69

Flux equations for carrier kinetics, an algorithm for writing down, and its application to co-transport, 467

Genetic recombination and base sequence complementarity, relation between, 409
GINGOLD, M. P. (see MOREL, J. E.), 17
GORDON, M. P. (see CHEN, J.), 53
GREEN, D. E., The structure of biological membranes in relation to the principle of energy coupling, 271

HARRIS, R. J. C., Latency and the tumour virus problem, 287
HASSELL, M. P. (see COMINS, H. N.), 93
HAWKINS, S. E., Recent studies of some RNAs and proteins in amoebae, 299
HIGUCHI, W. I. (ANDO, H. Y.), 211
HINMAN, L., (see CHEN, J.), 53
HO, N. F. H. (see ANDO, H. Y.), 211
HUANG, C. W. (see CHEN, J.), 53

Immune response, rate-sensitive chemoreceptor systems and the origin of, 429
Indoles and proteins, photomonomerization of pyrimidine dimers by, 53
Informational energy flow as an aspect of the ecological efficiency of marine ciliates, 69
Interaction of nuclear and cytoplasmic damage after treatments with toxic chemicals, 369
Iron-sulfur center N-2 oxidation and reduction by ATP, 115

KAPELLER, M. (see DOLJANSKI, F.), 253
Kinetics of aggregation phenomena. I. Minimal models for patch formation on lymphocyte membranes, 159

Latency and the tumour virus problem, 287
Lecithin bilayers, X-ray diffraction studies of, 447
LEE, J. J. (see RUBIN, H. A.), 69
LEWIS, J. H. and WOLPERT, L., the principle of non-equivalence in development, 479
Lymphocyte membranes, minimal models for patch formation on. The kinetics of aggregation phenomena. I, 159

MADDY, A. H., A critical evaluation of the analysis of membrane proteins by polyacrylamide gel electrophoresis in the presence of dodecyl sulphate, 315
Membrane proteins, critical evaluation of the analysis of, by polyacrylamide gel electrophoresis in the presence of dodecyl sulphate, 315
MICHEL-VILLAZ, M. (see CONJEAUD, H.), 1
MITCHELL, P. Possible molecular mechanisms of the protonmotive function of cytochrome systems, 327
Molecular mechanisms, possible, of the protonmotive function of cytochrome systems, 327
Monolayers at the oil/water interface as a proper model for bilayer membranes, 389
MOREL, J. E., PINSET-HÄRSTRÖM, I. and GINGOLD, M. P., Muscular contraction and cytoplasmic streaming: a new general hypothesis, 17
Multi-prey communities, predation in, 93
Muscular contraction and cytoplasmic streaming: a new general hypothesis, 17

Non-equivalence in development, principle of, 479

OHKI, S. and OHKI, C. B., Monolayers at the oil/water interface as a proper model for bilayer membranes, 389
OHKI, S. B. (see OHKI, S.), 389
Optical properties of photosynthetic membranes, photoinduced electric field effect on, 1
Optimality principles in arterial branching, 227
ORD, M. J. The interaction of nuclear and cytoplasmic damage after treatments with toxic chemicals, 369

Passive transport and biosynthesis, simultaneous. Systems approach to the study of drug transport across membranes using suspension cultures of mammalian cells, V, 211
Patch formation on lymphocyte membranes, minimal models for. The kinetics of aggregation phenomena I, 159
PERELSON, A. (see DELISI, C.), 159
Photoinduced electric field effect on the optical properties of photosynthetic membranes, 1
Photomonomerization of pyrimidine dimers by indoles and proteins, 53
Photosynthetic membranes, photoinduced electric field effect on the optical properties of, 1
PINSET-HÄRSTRÖM, I. (see MOREL, J. E.), 17
Polyacrylamide gel electrophoresis in the presence of dodecyl sulphate, a critical evaluation of the analysis of membrane proteins by, 315
Predation in multi-prey communities, 93
Prescriptive relational biology and bacterial chemotaxis, 141
Principle of non-equivalence in development, 479
Protonmotive function of cytochrome systems, possible molecular mechanisms of, 327
Purinergic receptors, 491
Pyrimidine dimers, photomonomerization of, by indoles and proteins, 53

Rate-sensitive chemoreceptor systems and the origin of the immune response, 429

Recent studies of some RNAs and proteins in amoebae, 299
REIN, R. and EGAN, J. T., The relation between genetic recombination and base sequence complementarity, 409
Relation between genetic recombination and base sequence complementarity, 409
Relational biology, prescriptive, and bacterial chemotaxis, 141
ROSEN, R., On rate-sensitive chemoreceptor systems and the origin of the immune response, 429
RÖSSLER, O. E., Prescriptive relational biology and bacterial chemotaxis, 141
